Drivers need to see what's behind them. They must not back up blindly! With a "backing cross view" you don't have to assume anything. Back-up accidents can be greatly reduced or avoided with a rear cross view mirror. *"Airborne Express says 'It's the right thing to do...'"* *"The U.S. Post Office says 'The rear mirror's value is simple and obvious'."* *"Federal Express says 'Immediately after installing these mirrors the backing up accident rate plummeted 36%'."*
