

What's New

EZ Check™

Truck Air Brake Adjustment Indicators

With **EZ Check™** installed on all your brake chamber push rods (both tractor and trailer) it's quick & easy to VISUALLY CHECK your brake adjustment.

Frequent inspections can:

- Keep a check on your automatic slack adjuster.
- Promote early detection of brake parts failure.
- Help to keep EQUAL adjustment of all brakes.

2006 **EZ Check™**
Tractor Only

2010 **EZ Check™**
Tractor & Trailer

Brake Boss™

The **Brake Boss™** is the most complete slack adjusting wrench available on the market for **both Manual & Automatic Slack Adjusters!**

2000 **Brake Boss™**

2013 **Brake Boss Accessory Tool**
Automatic Slack Adjusters:

1. Clip the "L" Accessory Tool* into the lock hole of your Brake Boss to perform the "Push-Pull" test.
2. Check the "slack" (free stroke). If the length is out, an adjustment must take place.
3. If the slack is less, a dragging brake can occur. Restore running clearance by backing off thread adjustment by 1/4 turn to 1/2 turn.

4. Proper Adjustment should leave 1/2" (1.25 cm) pushrod travel.

If you need to back off a ROCKWELL (now called ArvinMeritor) AUTOSLACK, push the handy clip under the pawl button as shown. It lifts the pawl enough to avoid any internal damage to the adjuster or pawl assembly during manual rotation.

Ask your Brake Boss Dealer for Accessory Kit 2013.

Strap Wrap Cranks™

- Durable, light-weight cast aluminum.
- Works with 2", 3" & 4" straps or 1/4" cables.
- Reduces physical stress on operators' wrists.
- Saves time safely stowing straps. (Takes approx. 10 seconds per 30' strap)
- Not recommended to torque load.
- Wraps straps neatly... minimizes strap fraying.

2020 Universal Tool

Works with sinches using center divider in the mandrel or 1 1/8" collar opening. Can be used with 2", 3" & 4" straps or 1/4" cables.

2021 Standard Tool

Works on shallow, standard and storable winches with 1 3/8" collar openings. Can be used with 2", 3" & 4" straps or 1/4" cables.

2022 Low Profile Tool (Ratchet)

Works on low-profile, shallow, standard and storable winches with 1 3/8" collar openings. Can be used with hand ratchets, air ratchets or drills with a 3/4" socket on 2", 3" & 4" straps or 1/4" cables.
